Chennai, Tamil Nadu

LinkedIn | GitHub

Artificial Intelligence and Data Science graduate with hands-on experience in exploratory data analysis, machine learning, computer vision, and real-world software development. Built end-to-end data analytics and AI projects using Python, SQL, Pandas, Scikit-learn, and OpenCV, with a strong interest in transforming complex datasets into actionable insights. Eager to contribute analytical thinking, curiosity, and problem-solving skills while continuing to grow in a collaborative product-driven environment.

Projects

COVID-19 Data Integration & Risk Assessment

Python • Pandas • Plotly • Matplotlib • EDA

Integrated and cleaned multiple COVID-19 datasets using Python and Pandas.

Performed EDA to identify vaccination trends and regional risk patterns.

Built interactive visualizations and developed a composite COVID risk score.

Intelligent Driver Monitoring System

Python • OpenCV • Computer Vision

Developed a computer vision system to detect driver drowsiness and distraction.

Implemented facial landmark analysis for eye closure and head movement tracking.

Designed a modular pipeline for future real-time alert integration.

Student Performance Prediction

Python • Scikit-learn • XGBoost

Built a machine learning model to predict student academic performance.

Applied preprocessing, feature engineering, and model comparison techniques.

Selected XGBoost based on predictive performance and evaluated model accuracy

Technical Skills

Programming Languages

Python, SQL • R (Basic) • C (Basic)

Data Analysis & Machine Learning

Data Cleaning • Exploratory Data Analysis (EDA) • Feature Engineering • Model Evaluation •
• Regression • Classification • Clustering • XGBoost • Random Forest • Decision Trees.

Libraries & Frameworks

Pandas • NumPy • Scikit-learn • OpenCV • Matplotlib • Plotly

Visualization & BI

Power BI • Matplotlib • Plotly

Tools & Platforms

Git • GitHub • Jupyter Notebook • Google Colab • VS Code • Supabase • Vercel.

Additional Project ---

Freelance Business Website – Naveen Landscapes

React • Vite • Supabase • GitHub • Vercel

- Designed, developed, and deployed a responsive business website for a landscaping company from concept to production.
- Collaborated directly with the client to translate business requirements into a modern, user-friendly solution.
- Integrated enquiry forms, project galleries, and backend services using Supabase with deployment on Vercel.

Education ---

Bachelor of Technology (B.Tech.)

Artificial Intelligence & Data Science

Saveetha Institute of Medical and Technical Sciences (SIMATS), Chennai

2022 – 2026

CGPA: 8.3 / 10

Relevant Coursework ---

- Machine Learning
- Artificial Intelligence
- Computer Vision
- Data Mining
- Database Management Systems
- Statistics
- Data Structures & Algorithms
